SharePoint Branding

SKYLINE

At Skyline, we realize that a great user experience goes hand-in-hand with a well-planned SharePoint site. Since each company is unique, we office brading options matched to your needs and budget.

Basic
Go beyond the standard SharePoint colors and make your Intranet your own. Use your company logo and your organization's specific color scheme for links, web part headers, menu header and promoted links.
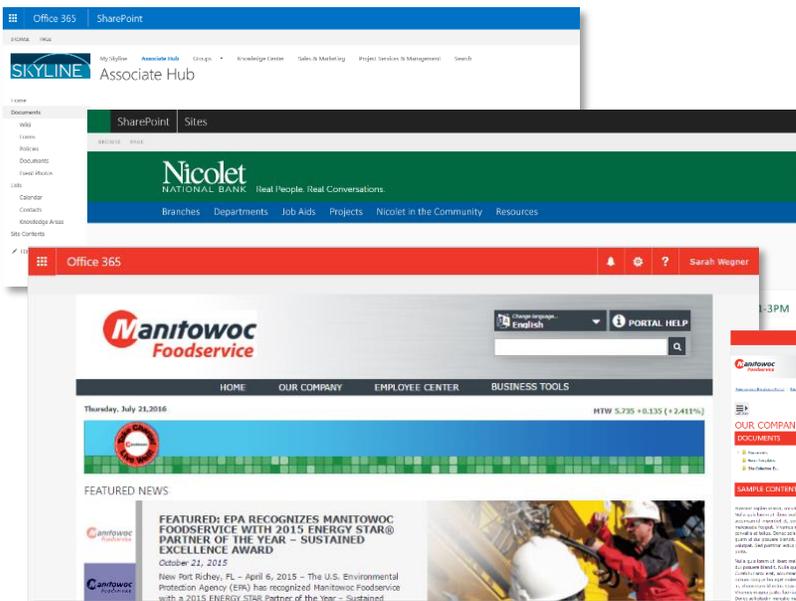

Enhanced
Skyline's Graphic Designers lend their expertise enhance the look and feel of your Intranet. This level includes a round of creative design to create a customized look for the SharePoint header, navigation areas, web part headers and changes to match your corporate color palette.

Advanced
That's SharePoint? Through multiple rounds of design planning, you'll achieve a custom look for your Intranet or Public website. Advanced branding can also include responsive design planning and customized footer, page layouts, top navigation and web parts, tailored to meet your needs.

Examples

Why Brand SharePoint?

1. Need a responsive site?
Extend the workplace by displaying your Intranet on mobile devices. SharePoint is not ready for mobile phones out-of-the-box, so let our team work with you to create a great mobile experience.

2. Want to create a cohesive brand?
Our Skyline designers will work with your corporate brand to create a custom Intranet or Public website that matches your culture and values.

3. Is SharePoint just too boring?
Create a custom look and great user experience that will allow SharePoint to be the single destination for your corporate content and collaboration.

Enhancements
Skyline also offers the following customizations to supplement your custom brand and pull everything together.

- **Customized Navigation:** Centralized location to manage the navigation for all your site collections.
- **Content Rotators:** Dynamic content to give your site a modern look with easy list-based management.
- **Content Roll-up:** Post content on subsites and flag content to also appear on your home page.
- **Themes:** Create color schemes to differentiate your divisions, locations, or departments.
